

Human Immunome Project

A new model for global health

Key information of the Stichting (Foundation) Human Immunome Project Europe

The Stichting is a non-profit foundation under Dutch law which will support the global objective of the Human Immunome Project (HIP) through outreach, advocacy, and resource mobilization. In late 2022, the Human Vaccines Project was renamed the Human Immunome Project.

Core activities of the European Foundation (Stichting)

- Contribute to overall objective of the Human Immunome Project (HIP) to improve global health and the individual lives of all the world's inhabitants. By decoding and modeling the immune system, we are:
 - Supercharging biological research and drug discovery, including the development of vaccines, diagnostics, therapeutics, and immunotherapies.
 - Decreasing healthcare costs worldwide.
 - Ushering in an era of personalized medicine.
 - Accelerating the UN Sustainable Development Goals (SDGs), specifically SDGs 3 (health and well-being), 9 (industry, innovation, and infrastructure), 10 (reduced inequalities), and 17 (partnerships for the goals).
 - Increasing health equity.
 - Protecting those most vulnerable to disease.
- Focus on outreach, advocacy, fundraising, creating partnerships and consortia to shape and strengthen the European contribution to the global research program by:
 - Establishing a network of leading European centers for human immunology and vaccination centers and connect them to the mission and activities of the Human Immunome Project.
 - Mobilizing financial support from the public, private, and philanthropic sector.
 - Advocate for scientific prioritization of the decoding of the immunome.
 - Working together with government institutions, academia, industry, and non-state actors – build champions and powerful alliances.
